Directions : Read the passage given below and answer the questions that follow (Q. No. 1 to 6) by selecting the most appropriate option.

As District Employment Officer, my Father was given a jeep by the government. There was no garage in the office, so the jeep was parked in our house. My father refused to use it to commute to the office. He told us that the jeep is an expensive resource given by the government he reiterated to us that it was not his jeep but the governments jeep. Insisting that he would use it only to tour the interiors, he would walk to his office on normal days. He also made sure that we never sat in the government jeep-we could sit in it only when it was stationary. That was our early childhood lesson governance-a lesson that corporate managers learn the hard way, some never do.

The driver of the jeep was treated with respect due to any other member of my Father's office. As small children, we were taught not to call him by his name. We had to use the suffix 'dada' whenever we were to refer to him in public or private. When I grew up to own a car and a driver by the name of Raju was appointed, I repeated the lesson to my two small daughters. They have, as a result, grown up calling him 'Raju Uncle' very different from many of their friends who refer to their family drivers as 'my driver'. When I hear that term from a college going person, I cringe. To me, the lesson was significant you treat small people with more respect than you treat big people. It is more important to respect your subordinates than your superiors.

Directions : Read the passage given below and answer the questions that follows (Q. No. 7 to 15) by selecting the most appropriate option.

Srinivasa Ramanujan (1887-1920) Ramanujan was born on December 2, 1887, in Erode (South India) as the eldest son in a family of six children. In November 1892, he entered, the Town High School at Kumbakonam as a half-fee scholarship holder and passed the Matriculation Examination in 1904. In the school, he became a minor celebrity, walking off with merit certificates and prizes for academic brilliance. This school nourished him for six years, bringing him as close as he would ever come to a satisfying academic experience.

When he was in the seventh standard he gave clear evidence of his mathematical gifts, he could reel off the square root of a natural number to the specified number of places; he could point to the indeterminate nature of zero divided by zero. Ramanujan's mother-the family being close to penury-took in college students as boarders who noticing Ramanujan's interest in mathematics, brought him textbooks from the college library. Loney's 'Trigonometry' was one such treasure which he mastered.

During 1906-1912, Ramanujan was constantly in search of an employer to earn his livelihood. With his "Note-books" as his only recommendation, he sought the patronage of V. Ramaswamy Iyer, the founder of Indian Mathematical Society who was at Tirukovillur and asked for a clerical job in his office. The former had no mind to smother Ramanujan's genius and sent him back to Madras with a letter of introduction to P.V. Seshu Aiyar, then at the Presidency College, Madras. He gave in turn, Ramanujan a letter of recommendation to that true lover of mathematics, R. Ramachandra Rao, the District Collector, Nellore. This was the turning point in his life.

On the advice of P.V. Seshu Aiyar, Ramanujan communicated his theorems on divergent series in a historic letter dated January 16, 1913 to G.H. Hardy, who was ten years senior to Ramanujan. With the personal interest of Gilbert Walker and support given by Indian stalwarts, the University of Madras awarded its first scholarship to Ramanujan to study in Cambridge. Over the next three months, Ramanujan received four long letters from Hardy, who had already sprung into action, advising the India Office, of his wish to bring him to Cambridge.
